FINANCIAL AND COMMERCIAL. WEDNESDAY, April 10. In its largely professional character, and to a great extent in the course of its fluctuations, the stock market to-day closely resembled that of yesterday and indeed the markets of the last three or four Stock Exchange sessions. Prices at first were irregular with a firmer tendency owing to general realization that the rumors upon which prices were decressed in the closing hours of business on and day before were utterly absurd. There was a vanishing of the ridiculous idea that the determination of the Interstate Commerce Commission to compel if possible the president of the Union Pacific Railroad Company to answer various questions that were put to him at the recent investigation held here into the affairs of the corporation afforded any valid reason for speculative sales of Union Pacific stock. It will undoubtedly be several weeks before legal proceedings looking forward to this end will be begun. A decision of the District Court of the United States adverse to Mr. Harriman will be appealed from and the matter will unques tionably be carried to the highest Federal judicial tribunal. It will be years before the matter will be finally settled or before there can be any conclusion of an effort that may likewise be made to force the Union Pacific Railroad Company to dispose of its holdings of Southern Pacific stock; and even when these efforts are concluded they will result in nothing other than the distribution of a large cash or stock dividend to the Union Pacific shareholders. All the indications to-day favored the probability of a reduction in the near future not only of the discount rate of the Bank of England but of the Bank of France, this being the inevitable result of a continual lowering of money rates in the open markets in Paris and London to a level decidedly below that maintained by the great national banking institutions there. In our own market to-day time money rates fell once more, again touching a new low record point for the year. The change was most noticeable as regarded the longer maturities, only 434 per cent. being bid for ninety days money, as against 4% per cent. yesterday, while money was offered for six months at 5 per cent, without finding takers in any quantity A 5 per cent, rate was also the highest that was bid for nine and twelve months funds. Shortly after the opening of business hours it was announced that the strike of electrical workers on the smelting plant at Great Falls, Mon., of the Boston and Montana Company, one of the subordinate organizations of the Amalgamated Copper Company, was over. These matters served to impart at once a more cheerful tone to the market and prices generally advanced until well into the afternoon. Then one of the familiar raids by speculators for the decline was begun and under this attack prices lost all and something more than

their early gain. Toward the end of the

day a partial recovery set in, leaving as a

rule small net declines in the majority of the

active stocks. The volume of business on

the Stock Exchange was considerably less

than it was yesterday. The particular pretext of the break in the market this afternoon was the publication of a statement on the slips of the two news agencies from which Wall Street obtains most of its hourly information on financial matters that there had been 'another reduction" of one-quarter of a cent a pound in the price of lake and electrolytic copper metal. The basis of this statement was a quotation reported from the "Metal Exchange" of 24% to 25 cents for lake copper and 23% to 24% cents for electrolytic copper. The New York Metal Exchange is, as persons at all familiar with conditions affecting the sale of copper in this market know, a small and insignificant concern whose so-called "quotations" are Actual declines of copper on sales occurring there are of the most trifling quantity, and the exchange is in fact an exchange only in name. The market for copper here is in the offices of the great copper selling agencies or of the copper companies that sell their product directly. It may be said that there has not been in recent weeks the slightest concession made in copper prices in the proper market for the commodity. These prices stand to-day, as they have for a long time, at from 251/4 to 25% cents for electrolytic copper and from 26 to 261/4 cents for lake copper net in this city. Prominence deserves to be given to the strong animadversion visited in the copper trade upon concerns like the 'Metal Exchange" assuming thus falsely to represent the market for copper metal, and the carelessness of reporting agencies who give publicity to such untruthful statements. There is no doubt that records of this kind are more easily gathered at the "Metal Exchange" than they are elsewhere, and that it is a matter of some difficulty sometimes to acquire knowledge concerning the actual state of the copper market from authoritative sources, this is no excuse why the effort should not be made on the part of those presuming to give Wall Street correct information as to the changes in the metal and other markets. Very little attention seemed to be paid in the financial district to-day to the one development of the day of substantial importance aside from the further ease in the money market; to wit, the Government's report of the condition of the winter wheat crop on April 1. The condition of the crop was put at 89.9 per cent., as compared with 89.1 per cent on April 1 last year, and indicated a yield of winter wheat in round numbers of 494,000,000 bushels, against 473,000,000 indicated a year ago. It is of course too early in the year for any certainty regarding the winter wheat output of the season. One thing that can now be learned trustworthily, however, is the amount of damage done to the crop by "winter killing"; and that the condition of the crop at the opening of spirng is higher than it was a year ago, when a bumper yield was gathered, is a circumstance that affords immense ground

for confidence as to the final harvest. New York Stock Exchange Sales, April 10 CLOSING PRICES OF UNITED STATES BONDS.

, THE CURB MARKET.

The curb market to-day was a small affair, the general trading being of the dullest description. Prices held fairly steady until the noos hour, but after this a reactionary tendency put in an appearance in sympathy with the depression of values on the Stock Exchange, the net results of the day being unimportant changes, running mostly to declines. The sole feature of the market was a continuation of the sharp upward movement in Standard Oil. Dealings in movement in Standard Oil. Dealings in this stock to-day were large, aggregating 207 shares, and the gain was 20 points, which makes a total net advance of about 56 points since the first of the present month. United Copper was strong but inactive, the other coppers all easing off. Manhattan Transit was less active and lower. Transactions in detail in the market to-day were as follows:

THE BOSTON MARKET.

Boston, April 10.—The market for copper shares to-day was rather dull, and inclined to weakness on the reduction in the bid price for the metal. Amalgamated was under pressure, but rallied shortly before the close, recovering half of the lose from its high point. Offerings in the general list were light. The close was steady.

The industrials were more active, American Pneumatic issues and United Fruit being the features, scoring advances of 2 points.

Paris 78 Rue de Richellen.

THE GRAIN MARKETS.

Prices Advance-Further Damage Reports -The Government Statement. Wheat closed higher, mainly because of bullish crop reports and general buying An advance took place early owing to dry weather in the Southwest, fear of a bullish Government report and considerable covering by nervous shorts. Liverpool, however closed quiet at the advance of %d. and some

other foreign markets were lower. In Paris

however, though wheat was slightly lower

flour advanced equal to % to 2%c. per barrel

Budapest advanced %c. A wag telegraphed to one house: "Do you hear of any damage to the Jersey crop? All the others seem to be killed." Shorts covered on the Government report stating the condition of winter wheat at \$9.9 per cent. This was lower than some had expected, although it compares with a condition of 89.1 last year and a ten year average

at this time of 85.3. The market was again flooded with bullish crop reports from the Southwest telling of damage from green bugs and drought. These had their effect, especially as not a few of them were accompanied by buying orders At Chicago commission houses were buyers of July. Leading operators there were buying May and July, although some who bought July sold May. The Northwest was buying at Chicago to some extent, and Winnipeg advices said: "The weather con-tinues cold and the season is exceedingly late. There does not seem to be any likelihood of seeding becoming general until the 20th of

On the other hand the cables were not very encouraging. Paris closed quiet and un-changed to %c. lower. Berlin declined %c. Where there were advances they amounted to little. In Chicago pit traders sold. Updike was

also a good seller.

It is largely a weather market and thus really uncertain as the weather vane. Damage has been done by drought, but rains could reduce the damage very materially.

Then, too, the cash trade continued sluggish, the reports in regard to the flour markets were the reverse of cheerful, the receipts were liberal and some of the crop reports were favorable. A Duluth despatch said that the seeding situation was about normal.

said that the seeding situation was about normal.

R. E. Sterling of Kansas City wired: "Scattering showers Sunday benefited wheat in Kansas; crop continues in splendid condition; some complaint of hardening of surface soil from lack of rain, but nothing serious. In every part of Kansas wheat shows best April condition in years, promising record crop if they have occasional rains between now and harvest. With increased acreage crop is almost certain to be large under moderate conditions. Continued talk of green bug in Oklahoma, but reports do not indicate increased injury over that already accomplished. Plenty of these insects in southern Kansas, but appear to be doing no damage. Wheat is so well grown as to be practically out of danger." Wheat is so well grown as to be practically out of danger."

The Northwestern Miller said of the flour market: Minneapolis—Estimated output somewhat larger this week than last. Flour moved slowly, though few mills reported slight improvement in Eastern inquiry. Virtually nothing done abroad. Mill feed 50 cents lower and mills necessarily ask relatively more for patent. Car supply at Minneapolis and outside points is very bad.

Chicago—Flour business lagged; winter was weak.

Milwaukee—Dull unsatisfactory week; foreigners out of market.

Milwaukee—Dull unsatisfactory.

eigners out of market.
St. Louis—Flour dull and unsatisfactory.
Ohio Valley—Business fairly satisfactory.
Kansas City—Flour very dull.
The scaboard cleared only 13,000 bbls.
of flour and 69,000 bush. of wheat. The

On the rise there was considerable realizing, partly for account of leading Chicago interests. There was an absence of aggressive selling for the decline, however. Selling was held in check by the fact that the Government condition applies to April , and since that date, bulls contend, the condition of the crop has been materially lowered. The April conditions of wheat and rye follow:

April Dec. April April 10

Wheat The area reported in December was: This crop. Last crop. Final, 1906. 31,684,574 31,312,000 29,599,961 2,000,764 2,100,000 2,001,904 The conditions in leading States: April, April, 1908. 1908. 1908. 89 92 92 92 91 90 85 91 95 85 92 90 88 91 92 Indicated winter wheat crop:

15.6 493,974,000 15.9 508,474,000 15.2 473,249,000 16.7 492,888,005 14.8 428,462,834 12.4 332,935,340

THE CORN SITUATION.

Higher prices prevailed partly by reason of the firmness of wheat and oats. Besides, the receipts were not heavy and there was no pressure to sell. Idverpool closed quiet and unchanged to %d. higher. Poor grading is still a leading feature. Some slight improvement of late does not alter this fact, which largely explains the firmness of prices this season. Keith and Logan & Bryan were sellers. Some bought on the lighter receipts. Others bought freely at the West on the general situation.

Some increase in the commission house business was reported. The cash market at Chicago advanced %c. Spot prices at Liverpool were % to id higher and some here and at Chicago are looking for a good export demand in the not distant future. Chicago, received 153 cars and expects 192 to-day. The primary receipts were 582,000 bush., against 439,000 last year, with shipments of 980,000, against 633,000 last year. The seaboard cleared 125,000 bush. Chicago reported charters for 200,000 bush to Buffalo. THE OATS PEATURES.

THE CORN SITUATION.

THE OATS FEATURES.

There was an advance, owing to bad conditions reported at the Southwest and a good demand for new crop months. Commission houses bought a good deal of July and September. The Northern Grain Company bought July and solu seay.

Chicago reported a fair shipping demand, with cash prices %c. higher. The receipts there were 141 care, with 187 expected to-day, The primary receipts were \$92,000 bush, against 54,000 last year, with shipments of 788,000, against 613,000.

Wheat on the spot was quiet. Sales, 88,000 bush. No. 2 red, 2c. under May f. o. b. afloat for export: No. 1 Northern Duluth, 4½c. over, opening of navigation: No. 2 hard winter, ½c. over, Futures closed % to ic. higher. Sales, 1,200,000 bush.

Corn was quiet on the spot. Sales, 50,000 bush. No. 2 mixed, in clevator, 58½c. No. 2 white, 65½c. I. o. b. Futures closed % to ¾c. higher. Sales, 40,000 bush.

Oats were quiet on the spot. Sales, 20,000 bush. Natural white on track, 30 to 33 lbs. THE SPOT MARKETS
